Projects

StarQuik Mobile App (Available on Play Store)

- Contributed to the development of the StarQuik Android app, a grocery shopping platform.
- Recreated multiple UI screens by referencing the live StarQuik app, ensuring accurate layout and responsive design.
- Developed the complete Wishlist feature (add/remove/view items) using Redux for state management.
- Integrated Shopify GraphQL APIs to fetch and display real-time product and category data.
- Focused on error handling, smooth loading states, and consistent UI behavior.
- Collaborated with backend developers and QA team members to test, debug, and deliver stable app features.
- Ensured Android-specific optimization and compatibility across various devices.
- Play Store : https://play.google.com/store/apps/details?id=com.starquik&hl=en_IN

Vaastu Wisdom Mobile App (Available on Play Store)

- Developed a screen displaying compass data in a clear table view format.
- Ensured smooth compass functionality on Android 12 and earlier versions.
- Used Redux for effective state management and JSON for dynamic vastu data handling.
- Upgraded app compatibility to support latest Android versions while maintaining backward support.
- Play Store : https://play.google.com/store/apps/details?id=com.vaastuwisdom&hl=en_IN

Watson Mobile App

- Developed a customized Shopify mobile app with dynamic UI powered by Theme Settings.
- Integrated Shopify GraphQL with Axios to fetch products, collections, and categories in real-time.
- Built Wishlist feature entirely using Redux for efficient state management.
- Designed layouts to be responsive and consistent across all devices.
- Improved error handling and optimized code for better performance.
- Worked closely with the team to test, debug, and deliver stable app releases.
